

Ski Day Policy

The Sherburne/Killington Trailblazers Ski Program is an integral part of Sherburne Elementary School's tradition and philosophy. It is aligned with the physical education program and meant to extend the skills learned in physical education. The ski program is designed to encourage healthful exercise and build community within the school population.

All the children who participate in the ski program are enrolled in structured ski classes and are required to ski with their fellow students through the duration of each class unless excused by the Principal.

Students who choose not to participate in the ski program are expected to remain in class and follow the time frame of a regular school day. This time is devoted to academic work and activities appropriate to each student.
